Start

Understand the SD

Available on intervalsonline

Select the Dev Environment

There could be multiple NAV Instances. Use the one which is dev instance

Mark the existing Objects that will be modified and verify available object ranges for new objects

See more details in the developer hand book About how to manage the bavkup.

Backup the mark Objects as .fob file

Modify/Create Objects & develop code

Make Sure the Developer hand book is followed

Make sure the MLC are implemented

Perform unit Testing

Perform integration Testing

Package & export the solution package
